

Hakan Yarıalı

MİMAR / ARCHITECT

Architectural design · Facades · Technical production
Visualization · Animation

01 Profile

I am an architect born in Konya. My experience spans architectural documentation, 3D modeling, visualization and BIM, as well as facade design, fabrication and site coordination. I have worked on aluminum facade design and site management for industrial estates in Konya. Today, through HY Archworks, I focus on visualization and animation for architectural projects at different scales.

03 Education

2017 - 2021

Necmettin Erbakan Üniversitesi
Faculty of Fine Arts and Architecture
Bachelor of Architecture

2016

Mehmet Münevver Kurban Anadolu
Lisesi

04 Professional experience

2026 BYAPI / BİSE MİMARLIK

Architect / Site Manager

As architect and site manager, I followed construction activities and prepared construction drawings. I worked on technical documentation and floor-plan presentations for residential projects. My warehouse responsibilities included material procurement and the preparation and maintenance of inventory lists. Combining drawing production, site follow-up and material tracking, I worked across project documentation and day-to-day construction requirements.

2025 İmaj Metal

Factory Technical Department / Site Manager / Architect

Facade design, documentation and visualization using steel, composite and ceramic materials. Fabrication and installation follow-up at Altınışan, Akasya and Kolat Industrial Estates; procurement, glass and aluminum orders, receipt and reporting. Quantity takeoff, quotations and project presentations. This experience also included site surveys, subcontractor scheduling and fabrication and installation checks. I addressed the relationships between steel subframes, composite panels and joinery in technical drawings. In order and unit documentation, I followed profile lengths, quantities, glass dimensions and material information, connecting office documentation with site workflows.

2024 Aksiyal Mimarlık

Architectural Office / Architect

Preliminary designs based on the project brief, Photoshop presentations and construction documentation. I translated project briefs into floor layouts and worked on different floor and apartment types. My colored plan presentations brought furniture, materials and circulation into a readable composition. I developed preliminary decisions into construction drawings, combining project development with presentation work.

CURRENT / HY ARCHWORKS

Independent architectural modeling, visualization and animation.

07 Personal details

Born: 1 July 1998 · Konya

Age: 28 (September 2026)

Driving licence: Held

Marital status: Married

Military service: Completed

Languages: English B2 · German A1

08 Experience / continued

2023

Rodos Alüminyum Sistemleri

Factory Technical Department / Site Manager / Architect

Production-ready aluminum shop drawings; preparation and tracking of glass orders. Quantities for joinery, curtain walls and composite cladding, quotations and professional system visualizations. My work included conservatories, vertical sliding glazing, bioclimatic roofs, awnings, conventional sliding and lift-and-slide systems. I combined technical drawings and quantities with production information and visualization. By working with dimensions, glass and profile relationships, I supported the information flow between workshop documentation and project presentation.

2022

Şerafettin Derin Mimarlık / Derin Project

Architectural Office / Architect

Construction documentation; area schedules, site coverage, floor-area ratio and parking calculations. 3D modeling and participation in project presentation meetings. I contributed to developing plans, sections and elevations within construction documentation. I related area and parking calculations to project decisions. Modeling and presentation work supported reviews by clients and the project team.

2021

Hakan Dülger Mimarlık / FAD YAPI

Architectural Office / Architect

Architectural project paperwork, construction drawings, 3D modeling and visualization. Alongside project paperwork and drawing production, I developed models into visuals for client presentations. This role gave me experience across documentation, construction drawings and visual communication in architectural practice.

2020

Karatay Belediyesi İmar ve Şehircilik Müdürlüğü

Office Internship

Design in accordance with regulations; identification of non-compliant items during project reviews. Learning municipal workflows for structural, mechanical, electrical and architectural projects.

2019

Asiller Yapı Denetim

Site Internship

Observation of building inspection processes, review of construction stages with inspectors and learning the building control system.

09 Award & interests

Creathon 2024 / Second place

Content Development for Next-Generation Cultural Spaces
